

Burrowing Owl

February/March 1999 Issue

Volume 28 No. 2

Welcome to Central New Mexico Audubon Society! Come join us. All our meetings and field trips are free and open to the public

Make a January Resolution to Get Involved

Filling the gap between Christmas Bird Counts and Spring Migration will be easy this year — the New Mexico legislature goes into session, and that can command all your birdwatching skills of observation, diligence, patience and perseverance! That is why we're asking you to get involved and insure that legislation enacted protects our wildlife.

Contact your state representative and senator and voice your **SUPPORT** for the following issues:

❶ The continued existence of the Conservation Services Division. No other agency in the State is as important to the nongame species in New Mexico — from their monitoring to their protection to their recovery. This program is currently funded by a general fund appropriation from the state legislature. Threats to “umbrella” its funding under Game and Fish amount to its nonfunding — i.e., nonexistence. Why? Because there is a group of constituents who believe that hunting and fishing (game and fish) are the **ONLY** legitimate concerns of a “Game and Fish” Department. Use your voice to urge a consciousness of conservation by rallying political and economic support for the Conservation Services Division.

❷ Legislation known as the “Riparian Enhancement Act”: a non-regulatory bill which would set up a grant, education, and technical assistance program which would result in restoration and maintenance of healthy riparian areas statewide.

❸ Legislation known as the “Reptile and Amphibians Protection Bill”: a bill which would prevent the commercial exploitation of New Mexico's native populations of the “herps.” Currently without protection, reptiles and amphibians are being collected and exported from New Mexico without any regulation whatsoever. Our experience in the past with other species should tell us how often the yellow flags of “threatened” or “endangered” go up when such practices are not mitigated.

❹ Also please write to Governor Johnson to support the nomination to the New Mexico State Game Commission of Ellery E. Worthen for District 5 (Bernalillo County) and Dr. Sanford D. Schemnitz for member-at-large. Stress the importance of having qualified people serve on the commission who have educational training and/or experience in wildlife management.

Want to get more involved? Follow issues more closely? Know just when to contact a key committee member? Call Dave Henderson at Randall Davey in Santa Fe, 983-4609. Meet with Conservation Voters Alliance and other enviro groups every Wednesday starting January 27 at 11:30 - 1:00 at State Land Office located in Santa Fe, 827-5760. To receive special notices about issues, send your e-mail address to bcokenm@aol.com. Visit the NM Legislature web site at <http://legis.state.nm.us>, and see what they are up to.

Oh, and one last thing: Check off **Share With Wildlife** contribution on your New Mexico State tax return. After all, when it's voluntary, it's not tax, is it?

—Beth Hurst-Waitz, president

Great Backyard Bird Count

The Second Annual 'Great Backyard Bird Count' takes place on February 19, 20, 21 and 22 this year. This is an easy but wonderful opportunity to participate in a continent-wide count of backyard birds. Co-sponsored by the Cornell Laboratory of Ornithology and the National Audubon Society (and supported by Wild Birds Unlimited and Ford Motor Company), the GBBC requires only that you observe birds in your own backyard for 15 to 30 minutes on any one of the four days (you can of course observe longer and more often if you wish), count the birds and submit your results directly on the Internet to the BirdSource website at <http://birdsource.cornell.edu>.

How to Count:

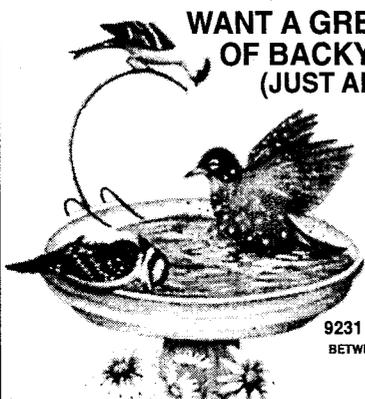

Each day that you observe, count the highest number of each species that you see at any one time. For example, if you see three American Robins and two Western Scrub-Jays at one moment, and after they leave, you see one Robin and four Scrub-Jays at another time, your report would indicate that you saw three Robins and four Scrub-Jays.

What to Count:

There are 140 species included on the GBBC checklist for New Mexico, many of whom are unlikely visitors to your backyard. You can view the checklist at the BirdSource website. You have the option to include all of the 140 species that you see or you can limit your count to just some of the species.

How to Report:

You need to do a separate report for each day you observe. Do not combine the count of Scrub-Jays for one day with Scrub-Jays seen on the other days, and do not use the highest total observed on one day as your total for another day unless you see that same number on the other day. →

Alert: New Bird Disease

A new disease called Coot and Eagle Brain Lesion Syndrome (CEBLS) is caused by a neurotoxin that creates lesions in the brains and spinal cords of bald eagles and coots. It is being tracked by the U.S. Army Corps of Engineers. If you see coots or eagles displaying impaired motor function, such as bobbing, weaving, and erratic walking and swimming movements, report these sightings to researchers listed on the CEBLS Web site at: www.mvk.usace.army.mil/od/odm/cebls.htm

Use the above form for new subscriptions only. Contact Membership Chairperson for changes of address or correction in your Burrowing Owl label. Nonmembers can receive the Burrowing Owl by sending your name and address with \$12 to CNMAS, c/o Beth Hurst-Waitz, 804 Guadalupe Circle, N.W., 87114-1710

GBBC cont'd

If you do not have your own access to the Internet, you can still participate by entering your counts at a Wild Birds Unlimited store or at most public libraries. Entry is a simple fill-in-the-blanks process. You can also count birds in your neighborhood park or other nearby place where birds regularly visit. For more information, visit the very helpful and easy to use BirdSource website.

February/March 1999

Programs: Audubon Birding Academy

For the next three meetings, in place of our regular meetings, Central New Mexico Audubon Society will offer a series of bird identification classes conducted by some of New Mexico's most accomplished birdwatchers.

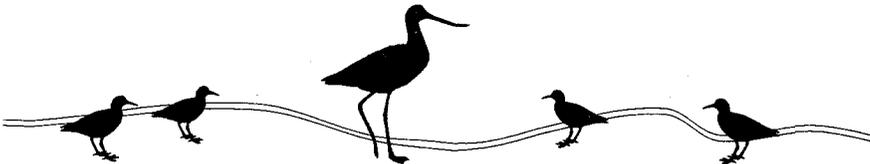

Just in time for Spring migration, learn or refresh your memory about the basics of behavior, habitat preference, and physical characteristics of Sparrows, Shorebirds, and Warblers found in our state. Get in the spirit of birding and bring along your binoculars and field guides to use during the slide shows.

All classes will be held at St. Timothy's Lutheran Church located at the corner of Copper and Jefferson NE. Please arrive early, doors open at 7:00 pm, to enjoy refreshments and meet other members. Classes will start promptly at 7:30 pm. Preregistration is requested. For more information, call Pat at 856-7443..

**The cost is only \$5.00 per class payable in advance or at the door.
Preregister for all three classes and the price is only \$12.00 (saves 20%).**

February • Sparrow Identification Class
Thursday, February 18
7:30 pm St. Timothy's Lutheran Church (Copper and Jefferson)
by Chris Rustay, New Mexico Coordinator for Partners in Flight

March • Shorebird Identification Class

Audubon Field Trips

Christmas Bird Count Report

Everyone is welcome on field trips: Audubon members and nonmembers, novice and experienced birders.

The information for the following compilations of the Albuquerque count and the Bosque del Apache NWR count was provided by Hart Schwarz and Steve Cox. Hart's group of 49 found 105 species (21,057 individuals). Steve's group of 25 found 115 species (65,360 individuals). You can review the results of other New Mexico counts at www.birdsource.cornell.edu.

February Trips

Sunday, February 14 Conchas Lake. Wintering sparrows, raptors and waterfowls. Meet at the West entrance to the Four Hills Shopping center on Central Avenue S.E. at 6:45 am. Dress appropriately for weather conditions and bring food, water and snacks for all day outing. Call Sei 266-2480 for details.

March Trips

Saturday, March 6 Montecello Point, Caballo Dam and Percha Dam. These sites often provide sightings of vagrant birds; and Percha Dam is one of the best year-round birding sites in New Mexico. Meet at the UNM Physics parking lot at the northwest corner of Yale and Lomas Blvd. at 6.45 am. This can be a day or overnight trip. Call Sei 266-2480 for details.

Saturday, March 20 Mystery Trip. Join Jim Place and Hawks Aloft for a trip to be determined by weather conditions and/or recent bird sightings. Meet Jim at the UNM Physics parking lot at 7 am. Call 883-1253 for details.

April Trips

Saturday, April 3 Bosque del Apache. Meet at the UNM Physics parking lot at 7 am for a full day of birding. Call Sei at 266-2480 for details.

Owls and Dogs

We're not talking about canines here, but prairie dogs. One would assume that these industrious earth moving rodents would be a good snack for a raptor but they play a much more important role in the lives of Burrowing Owls.

Burrowing Owls are small ground-dwelling owls found in open, dry grasslands, agricultural and range lands, and desert habitats from Canada to Mexico, and in some

southern states including Louisiana and Florida. They are opportunistic feeders, consuming mostly beetles and grasshoppers; mice, rats, gophers, and ground squirrels are also important food items; and lizards, scorpions, young cottontail rabbits, bats, and birds, such as sparrows and horned larks, are eaten as well. When one reads how far and wide the Burrowing Owl has adapted and how varied their diet is, it is surprising to learn that their populations are shrinking in many areas. Why? Pesticides and destruction of grasslands are contributing factors, but active programs for killing off prairie dogs are destroying more than their food source. Since the owls will eat just about anything they can carry off and they coexist well in some urban areas, it is becoming evident that the Burrowing Owl's Achilles heel is its dependence on ready-made nesting burrows supplied by ground squirrels and prairie dogs. So much so that, in Minnesota, Burrowing Owls have not bred since 1991 which is thought to be because of an active prairie dog eradication program by the U.S. and Canada.

Fortunately, in New Mexico, Burrowing Owls are faring better than in the northern states. Prairie dogs are being "managed" here as well, but not as extensively and

several groups are working to monitor Burrowing Owl populations to better understand what can be done to protect these small owls in the Southwest.

Auduboners can contribute to the knowledge on the Burrowing Owl distribution in the Southwest by looking for Burrowing Owls whenever you are out on field trips. Carol Findley is a graduate student in the Fishery & Wildlife Science Dept. at NMSU, and she is conducting research on the distribution and population dynamics of the Burrowing Owl. In your travels in New Mexico, Texas, Arizona, Sonora, or Chihuahua, you should record your Burrowing Owl sightings. A paragraph with date, location (highway mile marker, maps, or descriptions), number of birds, whether or not there is an obvious burrow, and general habitat should be emailed to rcampbell@zianet.com or mailed to Carol Findley, 1941 Mahogany Drive, Las Cruces, NM 88001.

One last note. Concern about the loss of nesting burrows has also inspired some creative designs for building artificial nesting structures for the owls. A California group has posted their plan on the web at: www.srscd.com/about/about_envir/envir_casebur/nestsite.html. These artificial burrows are quickly adopted by owls when positioned nearby owl colonies. Maybe we should be building Burrowing Owl condos.

Thursday Morning Birding Group

For information on weekly birding outings (every Thursday), call Julie Goodding at 255-9366. Meeting time and location, as well as duration, vary.

Enclosed please find my check for \$_____ (Each \$35 will sponsor one classroom in the Audubon Adventures Program. Any amount you contribute will benefit our educational activities.)

For Your Amusement

Scientist discovers unrecorded courtship dance.

37th Annual NMOS Meeting

The 1999 New Mexico Ornithological Society meeting will be held at the San Juan College in Farmington, on Saturday, February 20. The registration fee is \$5 per person (students are exempt) and \$16 per person for the banquet. Please contact Bo West, 10 Katchina, Los Alamos NM 87544, phone (505)662-7343 to register or for more info. Here is a schedule of some of the activities.

- Friday, Feb. 19**
7:00-9:00pm Registration at Best Western Inn & Suites, 700 Scott Avenue, Farmington
- Saturday, Feb. 20**
Early morning Field trip along Animas River Trail starts from Best Western Inn
10:30-noon Registration continues
11:00-11:45 am Business meeting
1:00-5:00 pm Paper Session, presentation of research papers
6:30pm Banquet at San Juan College in Sun's Dining Room
8:00pm Banquet Speaker: Dr. Tim Reeves "San Juan County Birds: Recent Research and Discoveries"
- Sunday, Feb. 21**
Field Trip B-Square Ranch, Tom Bolack's Ranch
Field Trip NAPI farms
Field Trip Morgan Lake

Newsletter Deadline

Materials to be included in the April/May issue of the Burrowing Owl must be received by March 15. Contact Browning Coke at 256-9130 or email bcokenm@aol.com.

Thank You!

We at Central New Mexico Audubon Chapter have been the recipients of a cornucopia of kindness recently, and we want to extend a cornucopia of thanks in return:

Jim Lewis, long-time member and teacher of the popular course at UNM on natural gardens and use of native edible plants, kindly donated a screen for use at our monthly meetings and school demonstrations. This is especially welcome now that the church's walls are painted green! Thanks, Jim, for your timely and oft-used gift.

Ina and Maynard Miller donated the book, "Birds of Israel," signed by the author. This is a comprehensive book that goes beyond art into science, with its in-depth research and compendium of statistical data and facts. As part of our CNMAS library, this book is available for any member to borrow. Let Donna Thatcher know if you're interested. Thank you, Ina and Maynard, for this lovely gift.

Rupert McHarney is an avid photographer who has pursued both birds and his art while on nature adventures throughout the U.S., Canada and Mexico. He recently donated 297 color slides to Central New Mexico Audubon Society, including a unique series of 19 slides of young burrowing owls off the nest—a rare experience! Thank you from all of us!

The neat thing about "Thanks-Giving" is we never really run out of people to thank. Our litany here wouldn't be complete without thanking Lynda Geron at the West Side Wild Birds Unlimited and Geni Krolick at the Wild Birds Unlimited on Montgomery for publicizing our Chapter events in their newsletters. Thanks for helping us get the word out!
